

THE PRINCE GEORGE'S COUNTY PLANNING DEPARTMENT
IS PLEASED TO ANNOUNCE THE LAUNCH OF THE

Intake and Regulatory Review Division

The Intake and Regulatory Review Division (IRRD) is a new initiative designed to streamline services and enhance your experience with planning, zoning, and permitting in Prince George's County.

THIS NEW DIVISION INTEGRATES THREE KEY SERVICES:

PLANNING INFORMATION SERVICES

Our Planning Information Services team provides expert guidance on planning and zoning information for properties in Prince George's County, assisting both residents and developers with their inquiries.

APPLICATIONS

We are transitioning to a new digital platform, DARTS, replacing DAMS with a more modern Customer Self-Service portal and updated tools to improve data access, provide real-time updates, and streamline application submission and tracking.

PERMIT REVIEW

The Permit Review section ensures plans comply with the Zoning Ordinance by reviewing applications, providing feedback to applicants and the County permitting agency, and helping navigate the process to support safe, compliant development.

This integration means faster service, better coordination, and easier access to the tools and information you need.

WHAT TO EXPECT:

- Expert guidance on planning and zoning
- A new digital platform (DARTS) for application tracking
- Streamlined permit reviews with clear feedback
- Real-time updates and improved transparency

This is more than a restructure – it is a commitment to innovation, efficiency, and exceptional service for our residents, businesses and development partners.
